Sensor	HD 1280×720p	Batteries	Rechargeable and interchangeable lithium
Connection	Android & iOS (via Wi-Fi or cable)		
Field of view	120°		
Illumination	Integrated high-intensity LED		
Operating temperature	0°C a 60°C		

The "VTN-MOB" is a simplified, connected version of the veterinary endoscope.

Designed to offer an excellent quality/price ratio, it retains all the mechanical and optical performance of the PLUS model, including two internal channels: a 2.8 mm working channel for instrument introduction and a dedicated channel for active lens cleaning.

By removing the integrated screen in favor of a direct connection to smartphones and tablets (Android or iOS), the VTN-MOB video endoscope becomes a modern, lightweight, and mobile tool, perfectly suited for veterinarians in the field.

Included accessories:

Hard carrying case
USB-C cable
Cleaning brush
Air/water pump
Syringe
Connection adapter (depending on Android/iOS version)
User manual

Main use:

Gastric and esophageal endoscopy

Warranty:

1 year – repair service
