Operating Temperature	0°C a 60°C		

The VTN GASTROINTEST has been developed to provide veterinarians with a solid, intuitive instrument suited for daily clinical practice.

The ergonomic handle, the presence of a 3.2 mm working channel, and the wide articulation of the distal tip make it particularly well-suited for gastrointestinal applications in large animals.

The ability to record photos and videos, combined with viewing on the integrated monitor and compatibility with external systems via the Image Dock, makes the VTN GASTROINTEST a modern and complete solution.

Included Accessories:

- 1 videoendoscope with integrated monitor
- 1 rigid carrying case
- 1 user manual
- Basic connection accessories
- Power supply / system charging unit

Main Applications:

Gastric and esophageal endoscopy

Warranty:

1 year – repair service
